Antoan Petrov

Mid Full Stack Developer | AI Engineering Enthusiast | Learning AI Models, LLMs & Generative AI | RAG | LangChain | LangGraph
Sofia, Sofia City, Bulgaria

Summary

Hi, I’m Antoan, a Mid Full-Stack Developer with 4 years of professional experience building and maintaining web applications.Over the past few years, I’ve been working mainly with Vue.js 2, NestJS, PHP/Laravel, as well as writing Unit and Feature Tests with Laravel. I also have hands-on experience with GraphQL, PostgreSQL, MySQL, MongoDB, Git, Redis, Docker, and Jenkins.Alongside my main stack, I’m familiar with Vanilla JavaScript, Node.js, Vue 3, Nuxt 3, React, and Express, and I have experience with unit and E2E testing using Jest, Mocha, and Chai.I enjoy solving problems, learning new technologies, and working as part of a team. Currently, I’m also exploring AI agents, agentic workflows, and AI integrations to expand my skills and understand how they can be applied in modern software development.

Experience

Delasport
Full Stack Developer
January 2023 - September 2026 (3 years 9 months)
Sofia, Sofia City, Bulgaria
